Pocahontas, TN | 675 +/- Acres | \$4,395,000

Spanning nearly 700 acres of impeccably maintained land, this estate is a rare gem, offering a scale and condition that are almost impossible to find. Nestled in the rolling hills of West Tennessee, the property combines natural beauty with extraordinary functionality, located just 1 and 1/2 hours from Memphis, 45 minutes from Jackson, and less than 3 hours from Nashville. At the heart of the estate is a custom-built 4,100 sq. ft. main house, blending luxury and craftsmanship with features like reclaimed heart pine floors, hand-hewn beams, seamless marble bathrooms, and a deck that extends over a professionally managed trophy bass lake.

Several features that make this property truly rare, if not unique, are the two running creeks and three beautiful lakes situated throughout the farm. Complementing the main house are a rustic hunting lodge with wraparound porches, a charming farmhouse, and extensive infrastructure including an equipment barn, multiple storage sheds, 3+ miles of developed roads, and a 40+ mile well-maintained trail system. The property is a haven for recreation and relaxation, with three professionally managed lakes totaling nearly 20 acres, miles of clear running creeks fed by two separate systems, and abundant wildlife, including turkey, deer, and small game, thanks to minimal hunting pressure. Rolling hayfields that could be converted back into income-producing crop ground, mature hardwood and pine forests, and a rare, well-managed chestnut tree grove add to the estate's allure, while a mature garden and vineyard provide the perfect setting for a self-sustained lifestyle.

For those seeking additional potential, the estate offers ample space for a private landing strip, making this property convenient for out-of-town buyers. With its unmatched scale, premier location, and turn-key condition, this estate represents the pinnacle of luxury living, recreation, and land stewardship in West Tennessee.

# CHESTNUT ORCHARD

Once a dominant species across many forests, American chestnut trees thrived until the mid-20th century when chestnut blight nearly wiped out their population. In response, scientists have spent decades developing blight-resistant varieties to restore this iconic tree. In collaboration with the University of Tennessee, this carefully planned chestnut orchard has been established, featuring resilient trees that contribute to both conservation efforts and the property's agricultural value.
